About Us

Arunika Lestari (“Aruni”) is an environmental and sustainability consulting firm dedicated to helping businesses achieve regulatory compliance, strengthen sustainability performance, and create long-term value.

Drawing on multidisciplinary expertise in environmental permitting, ESG, and green building, we deliver integrated, evidence-based solutions that address complex environmental and sustainability challenges.

As a trusted one-stop partner, we work alongside our clients to turn sustainability commitments into practical action and measurable impact—lighting the way toward a more resilient and sustainable future.

Lighting the Way to Sustainable Society and Environment

Our Vision

To shape a future where business growth and environmental sustainability go hand in hand, creating lasting value for society, nature, and generations to come.

Our Mission

Aruni

1 **Guide businesses** through environmental compliance with clarity, integrity, and technical excellence

2 **Empower organizations** to embed sustainability through credible ESG and climate solutions

3 **Deliver integrated** environmental, ESG, and green building services that create real, measurable value

4 **Advance environmental** awareness and capability across the industries we serve

Message from the Director

At Aruni, we believe business growth and environmental responsibility can—and must—advance together.

We exist to help businesses navigate environmental compliance, strengthen sustainability performance, and create long-term value. Combining technical expertise with strategic ESG insight, we deliver practical, data-driven solutions that turn sustainability commitments into measurable action.

Together with our clients and partners, we are lighting the way toward a more resilient and sustainable future—for society, nature, and generations to come.

Warm regards,

Arfien Farhan Fadhillah, S.T., M.T., M.Eng.

Director, Arunika Lestari

Our Business Lines

Aruni Enviro

We provide end-to-end environmental permitting and compliance solutions to help businesses meet regulatory requirements and operate responsibly

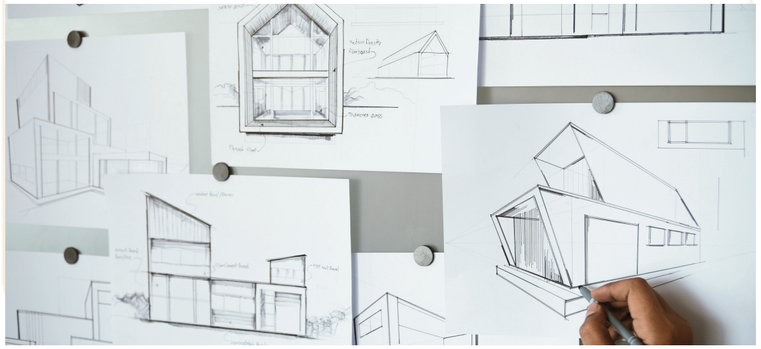

Aruni Sustainability

We provide integrated ESG and sustainability solutions to help businesses measure performance, manage sustainability risks, and communicate long-term value

Aruni Architectural & Green Design

Designing functional, efficient, and sustainable buildings through the integration of architectural excellence and green building principles

Aruni Enviro

We guide clients through the environmental permitting process with clarity and confidence, helping projects meet regulatory requirements while staying on track for responsible delivery.

Planning & Assessment

- **Environmental Permitting**

  AMDAL/DELH, UKL-UPL/DPLH, Adendum ANDAL & RKL-RPL Rinci, SPPL

- **Technical Study**

  Pertek PMBAL, Pertek Emisi, Rintek LB3, Pertek Andalalin, SLO

- **Forest and Land Area Permitting**

  PKKPR, PBG, SLF, PPKH

- **Feasibility Study (FS)**

  Comprehensive initial assessment to evaluate environmental, technical, and regulatory viability before project execution and master permitting

Submission & Compliance

- **Scientific Research and Environmental Studies**

  Air/Water Quality Modelling, Hydrology & Hydrogeology Modelling, GIS Mapping & Spatial Analysis, Biodiversity Survey

- **Ongoing Reporting & Continuous Compliance**

  Reporting on the Implementation of the RKL-RPL; Reporting on Hazardous Waste Management and Waste Balance Sheets; Assistance with Environmental Audits and PROPER Preparation

- **Pelatihan & Capacity Building**

  Training on Environmental Permitting; Training on Environmental Compliance

Aruni Sustainability

We help organizations translate sustainability ambition into credible ESG strategy, measurable performance, and clear stakeholder communication.

Strategy, Performance & Sustainability

- **Sustainability Reporting & Disclosure**

  Sustainability Reports (GRI, SASB, TCFD, ISSB/IFRS S1 & S2); Materiality Assessment

- **GHG Accounting & Decarbonization**

  Scope 1, 2, and 3 Emissions Inventories; GHG Inventory; Target Setting (SBTi/Paris Agreement); Net Zero Roadmap; Climate Risk Assessment (TCFD/IFRS S2)

- **ESG Strategy, Governance & Assessment**

  ESG Roadmap & Strategy; ESG Framework Development; Stakeholder Engagement; ESG Assessments and Gap Analysis

- **Carbon Markets & Nature-based Solutions**

  Carbon Economic Value (NEK) & Carbon Markets; Carbon Project Support & MRV; Nature-Based Solutions (NbS); Climate Finance Advisory Services

Reporting, Compliance & Capacity Building

- **Sustainable Finance**

  Green/Sustainability Bond Framework; Sustainability-Linked Loan (KPIs & Targets); Indonesian Sustainable Finance Taxonomy Classification

- **CBAM & Trade Compliance**

  CBAM Exposure Assessment; CBAM Reporting & Compliance

- **Verification, Assurance & ISO Certification**

  Preparation for GHG Verification; Support for Assurance Statements; Implementation of ISO 14001 (SML), ISO 14064 (GHG), and ISO 50001 (Energy); Gap Analysis and Readiness

- **Training & Capacity Building**

  GHG Accounting Training; SBTi & Net Zero Training; ESG & Sustainability Training

Aruni Architecture & Green Building

We promote resource-efficient architecture and green building, focusing on innovative design and environmental responsibility.

Key Deliverables

Architecture

- **Sustainable Architecture & Design**

  Architectural Design; Green Landscape; Energy-efficient passive design; Environmentally master and site planning

- **Environmental Engineering & Clean Water**

  Wastewater Treatment Plant (Domestic & Industrial); Water Recycling & Reuse Systems Rainwater Harvesting & Building Water Management

- **Renewable Energy Integration**

  Design and Integration of Rooftop and Ground-Mounted Solar Power Systems; Building Energy Efficiency Audits and Assessments

Green Building

- **Green Building Certification**

  Greenship (GBCI), EDGE, and LEED Certification Support; Green building assessment, gap analysis, and readiness

- **Green Retrofit & Building Advisory**

  Retrofitting existing buildings to make them greener and more cost-effective; Consulting on sustainable building operations

- **Circular Economy & Waste Solutions**

  Circular economy waste management solutions (BSF/maggots); Integrated waste management systems for communities and buildings

Why Choose Us

Integrated Expertise

Bring environmental, ESG, and sustainability perspectives together in one coordinated approach.

Practical Solutions

Translate complex requirements into clear actions that work in the real world.

Evidence-Based Advice

Ground recommendations in rigorous analysis, reliable information, and sound professional judgment.

Trusted Partnership

Work closely with clients to build confidence, clarity, and lasting progress.

Long-Term Value

Support resilient decisions that strengthen performance for people, planet, and business.

Our Approach

Aruni

01

Discover

Understand your goals, context, and environmental priorities.

02

Assess

Review risks, requirements, data, and opportunities.

03

Strategize

Shape a practical roadmap aligned with your objectives.

04

Implement

Turn recommendations into coordinated, measurable action.

05

Improve

Track progress, learn, and strengthen performance over time.
